

MEHDI TALEGHANI

CLOUD AI ENGINEER

PROFILE

I'm a tech enthusiast passionate about AI, DevOps, and cloud computing. I enjoy working with LLM applications, Linux (KVM), AWS, and Kubernetes, while automating workflows with Python, Git, and Terraform. I also have experience with VoIP (Asterisk) and love optimizing infrastructure for efficiency and scalability. Beyond the tech, I value critical thinking, collaboration, and leadership, always looking for innovative solutions and new things to learn. Let's build something awesome!

WORK EXPERIENCE

Vaza.ai

CTO & FOUNDER

AUGUST 2025- CURRENT

Providing cloud AI solution architect — designing scalable AI platforms with:

- Cloud & architecture: build secure, cost-efficient AI pipelines and deployments.
- MLOps & DevOps: enable CI/CD, monitoring, and reliable model lifecycle management.

DevOpsIran.com

CLOUD AI CONSULTANT

JUNE 2025-CURRENT

- Provided consulting and training, specializing in implementing AI solutions within DevOps pipelines.

OwnerInspections.com.au

DEVOPS & AI ENGINEER

DECEMBER 2024- CURRENT

- Designing and deploying scalable cloud-native and AI-driven infrastructures, implementing CI/CD automation, and integrating cloud services to improve system scalability and reliability.
- Developing and integrating AI solutions into business processes and service systems to enhance performance, automation, and decision-making.

WORK EXPERIENCE

BlueCouch.AI

AI ENGINEER

APRIL 2025-SEPTEMBER 2025

- Develop and maintain a cloud-based AI application for an online insurance company, streamlining workflows for insurance brokers.
- Architect and deploy the solution on AWS while integrating self-hosted tools for enhanced flexibility and performance.
- Optimize system scalability, security, and efficiency to ensure a seamless user experience and operational improvements.

LinuxAcademy.ir

FOUNDER & CEO

2022-CURRENT

- An online academy dedicated to teaching Networking, Linux, Virtualization, DevOps, and AI.
- Deliver live and recorded lessons, conduct webinars, and provide in-person training to help professionals upskill.
- Offer consulting services, guiding businesses and individuals in adopting modern IT and automation practices.

iCallPartner.ir

FOUNDER & CEO & & SYSTEM ADMINSTRATOR

2011-2022

- Founded and led an outsourcing call center business, overseeing operations, technology, and client relationships.
- Designed, implemented, and maintained the VoIP infrastructure using Asterisk and other self-hosted tools.
- Managed system administration, ensuring high availability, security, and performance of call center platforms.

EDUCATION:

Master of Business Management

2007-2011

- Mechanical Engineer| Moscow State Technical University of Civil Aviation

Achievement in AI course

2025 - 2025

- HuggingFace

SKILLS:

- LLM-Base
- Applications
- Linux Virtualization (KVM)
- Git/GitHub/GitLab
- Amazon Web Services(AWS)
- Python Programming Language
- Docker, Podman, and Kubernetes
- VoIP and Asterisk
- CI/CD Pipelines
- Monitoring & Logging
- Networking & Security
- Infrastructure as Cod
- (Terraform/Ansible)
- Google Cloud
- Storage (Ceph /minio)

SOFT SKILLS:

- Effective Communication
- Critical Thinking
- Leadership
- Problem-Solving
