TEACHING EXPERIENCE

Name of Academy: Andisheh Dadeh Pardaze Artin (ADPA) 2015

Name of Course: ESET and Kaspersky Anti-Virus

- Learn to implement anti-virus on network
- Learn about differences between Home edition and Network edition
- Learn to install and configure KSC10 and ESET Administration 5
- Learn to use Central Console to control clients to update and have policy

Name of Academy: Andisheh Dadeh Pardaze Artin (ADPA) 2015

Name of Course: Firewall and UTM

- Learn about differences between old firewalls and NGFW (Next Generation Firewall)
- Learn to install and configure Frigate and Cyberoam UTM
- Learn to use Web Console to set policy based on organization`s requirements
- Learn to connect UTM devices to Syslog Servers

Name of Academy: Andisheh Dadeh Pardaze Artin (ADPA) 2015

Name of Course: DLP (Data Loss/Leakage Prevention)

- Learn about DLP solution and modules
- Learn to install and configure IP-Guard DLP
- Learn to use Central Console to monitor end-points and set policy to prevent

INNOVATION

Company: Andisheh Dadeh Pardaze Artin (ADPA)

2015

I could find a way to decrypt many files which were encrypted by Ransomware and Crypto-Lockers. It led to save money for some company customers and I was awarded by my company.

That was done without famous decoder such as Kaspersky, ESET, McAfee or another popular brand. All Malwares in every new threat and attack show new Gesture, however, there are some same subjects that could be useful to predict them.

JOB EXPERIENCE

Behnam Sanat Paya Co.

Nov 2011 - Jun 2012

Location: Iran, Tehran

Position: Network Assistant

It has created since 1975 and had 2 main offices at center of Tehran and an office services in vicinity Tehran and many re-sellers in provinces of Iran. Nature of this company is industrial. I was network assistant in the main office and supported all of buildings.

Website: www.kosarfcir.ir**ADPA (Andisheh dadeh Pardaz Artin)**

Apr 2014 - March 2016

Location: Iran, Tehran**Position:** Vice President

I have worked as Technical Manager and Security expert at ADPA Company and now I was working as a Director of Technical Department. I provided some weekly reports and documents which were related to my tasks for headquarter. Also, sometimes I made documents and presentation about our products in order to present and propagate to our customers or to find new customers.

Additionally, I was responsible for R&D (Research And Development) for new products and solutions which are pertained to Company's field. Furthermore, with the start of every new project, I was responsible for the successful initiation, planning, design, execution, monitoring, controlling and closure of a project as Project Manager. Defining Scope, Resource Planning, Developing Schedules, Time Estimating, Documentation, Risk Analysis, Team Leadership, Controlling Quality to reach and evaluate targets were some activities and roles at this position.

I was in charge of:

- Managing technical staff
- Providing security solutions for customers including network and edge such as monitoring, switching, routing, firewall, UTM (Unified Threat Management) or End-point solution such as Anti-Virus, DLP (Data Leakage Prevention).
- Providing customer feedback for deployment of product (hardware & software).
- Response to customers requests in a professional manner.
- Providing online, remote and local technical support to all Customers for applications & technical issues and Products related.
- Research and Development new products and solution.

- Providing advices on a wide range of information systems issues and security solutions on the Edge, Internal or End-Point in network.
- Design and Plan strategy, policy, management, security and service delivery for organization.
- Install and Configure Cisco solutions such as switches and routers in the LAN and WAN area.
- Install and Configure Microsoft solutions such as Windows server, SQL server, Active Directory, Domain Controller and some like these.

COMMENTS

I know Security solutions that could be used in network such as DLP solution, Firewall solution (UTM for example FortiGate) and some like this. I am specialist in Fortigate and Cyberoam and IP-Guard DLP. I have certificated by Kaspersky and Falcongaze for Security Tower DLP.

Additionally, I have IELTS (5.5) and GRE certificates.

Self-Studies:

-Familiar with Cisco Nexus Switches and CCNA Data Center course.

-Familiar with C#.net

-Familiar with Security+ concept

-Familiar with ISMS concept

My new experiences:

-Familiar with UTM devices including Sophos, Juniper and Specialist in FortiGate and Cyberoam.

-Familiar with Fortinet products including FortiWeb, FortiAnalyzer, FortiDB and etc.

-Specialist in Kaspersky Security Center, ESET.

-Specialist in IP-Guard DLP.

-Familiar with Mikrotik Router Board & Wireless.

HOBBIES

I do like music and sport. I've played guitar since 2008. Also, I can teach guitar acoustic and pop style. I've experienced in learning guitar about 3 years.

Regularly, I go to sport at least 3 times per week. My favorite's sports are swimming, jogging, skating, bodybuilding and football.

Usually, I follow new articles regarding new Technologies, security solutions and some Web Sites related to rank of security products such as Gartner, NSS Lab and AV- Comparative.

EXPECTED SALARY

Negotiable based on project.
